WNC HEALTH NETWORK

Providers Working Together

WNC Health Network, Inc. is an alliance of hospitals working together, and with partners, to improve health and healthcare.

In over 20 years of partnership, our staff and member hospitals have worked together across facilities and systems to support best practices and innovate towards excellence.

Together, we contribute to healthy and thriving communities and care systems by:

- Strengthening local and regional capacity to improve health
- Aligning and connecting key partners for greater impact
- Focusing on measurable results

We Strengthen Health Improvement

We lead **WNC Healthy Impact**, a partnership and coordinated process between hospitals, public health agencies, and key regional partners in western North Carolina, working towards a vision of improved community health. We are working together locally and regionally on a community health improvement process to assess health needs, develop collaborative plans, take coordinated action, and evaluate progress and impact.

12. Erlanger Murphy Medical Center
13. Park Ridge Health
14. Rutherford Regional Health System
15. St. Luke's Hospital
16. Swain Community Hospital
17. Transylvania Regional Hospital

We Focus on Results

Results-Based Accountability™ (RBA) is a disciplined, common-sense approach to thinking and acting with a focus on how people, agencies, and communities are better off for our efforts. RBA helps hospitals shift from volume to value. WNC Health Network embraces the RBA framework to support our partners in "getting to results."

We provide our local hospitals and public health agencies with tools and support to collect, visualize, and respond to complex community health data. Online scorecards share real-time information with community members, partners, leaders, and funders about how they are improving the health of their communities.

Connect with Us

WNC Health Network offers our skills and connections to support hospitals and their partners to create a western North Carolina where residents can thrive and live their healthiest lives.

Please reach out to us! If you're working on an issue at the intersection of hospital and community, we can strengthen your efforts towards measurable results. If an issue can't be solved by any single agency or program – if it's complex and there's lots of moving parts outside of your control – we specialize in working across agencies and sectors to get to measurable results together.

Included in the core support provided via WNC Healthy Impact for Community Health Assessment:

- Collect, manage, and report western North Carolina secondary dataset
- Collect & report regional community health survey data (via the centralized regional process)
- Conduct & report county-specific key informant interviews
- Make county-specific 211 resource inventories available
- Make a selection of county-specific maps available
- Provide Community Health Assessment (CHA) & State of the County Health Report (SOTCH) templates (paper and Scorecard)
- Conduct regional trainings
- Provide tailored training, coaching, and support for local process leaders
- Support partnership and dialogue between hospitals and public health agencies
- Provide training and coaching to infuse Results-Based Accountability into community health improvement planning

Fee-for-service extras that WNC Health Network can provide to support local capacity around CHA/CHIP:

- Support collection, management, analysis, and reporting of additional local data (not included in the WNC Healthy Impact regional primary and secondary dataset)
- Plan, prepare, facilitate and report findings from focus groups/listening sessions
- Present community health data to local partners
- Provide evaluation planning and support
- Facilitate local health issue prioritization
- Facilitate cross-sector community strategic planning
- Write Community Health Assessment
